GET THE FULL SOUNDSCAPE

Life offers so many marvellous sounds. Wouldn't it be great if you could effortlessly hear them all?

Now you can.

Introducing Coselgi Unia™, a cutting-edge hearing aid that simply offers you sound like no other. Plus, it comes with lots of new cool features to help you enjoy the full soundscape of life.

Lose no sounds

From sounds that are soft and subtle to the ones that are loud and lively, nothing will be lost when you listen with Unia™. Because with Unia™ you get Real Input technology, which ensures one of the widest input ranges in the industry. This means that you will be able to enjoy less distortion in noisy environments.

A smooth experience

Your surroundings constantly change, and so should the way your hearing aid listens. Unia™ comes with Acoustic Situations Tech-

nology, an automatic program with nine sound classes. This program recognizes and accurately classifies and adapts to your sound situations. Having drinks at the bar? Joining a meeting? Unia™ will provide a comfortable, balanced and clear sound experience. Even in challenging listening environments.

Hear the moment

Unia™ has multiple sound-refining technologies to tackle noise and help you hear the moment. It simply focuses on what's happening right here, right now. When speech is dominant, Unia™ will focus on that. And when there's noise present, Unia™ will reduce it. That way you get more listening comfort. And you don't have to spend energy on trying to focus on what's relevant – Unia™ will do that for you.

Listen to what you want to hear

Unia™ lets you carry on with what you're doing, effortlessly and without interruptions. The Wind Noise Control System is one of the world's most advanced wind-noise reduction systems. In fact,

it's proven to offer a minimum of 40% improvement in speech identification compared to when the feature is turned off. So you can clearly hear different sounds in windy situations. And when you're in a quieter environment, the Ambient Noise Reduction System will ensure that soft, unwanted steady-state noises won't disturb you.

Stay connected

Unia™ works with all DEX™ connectivity solutions, so you can access music, phone calls, TV and more. You can also control your hearing aids remotely.
