SEAMLESS CONNECTIVITY

Do you want to stay tuned into the people, places and programmes you care about – without having to fiddle with your hearing aids?

Let us suggest the Coselgi Effect™ family of hearing aids.

Superior sound in every situation

Coselgi Effect helps you seamlessly connect with your world by making it easier than ever to hear – no matter where you are or what you're doing.

Now it's possible to hear nuances like a gentle rain, a cat's purr or a child's whisper easily and comfortably. Even in hard environments, the hearing aids will make adjustments to improve the sound. Thanks to intelligent automation, you can just sit back and connect.

Stay connected

Sounds from smartphones, smart speakers, TVs and tablets are a normal part of life these days. With Coselgi Effect, you won't miss out. Coselgi Effect seamlessly connects to iOS devices, so you can stream high-quality audio straight to your hearing aids (select Coselgi Effect models only).

If you use Android devices, a DEX accessory can help you simply stream audio directly to your hearing aids.

Intelligent automation

Coselgi Effect uses intelligent automation to help you hear your best – without you having to do anything. For example, it constantly analyses the sounds around you and adjusts more

settings than ever before to ensure that you hear high-quality sound comfortably and experience better speech understanding, even in wind and noise.

Lots of easy control options

Even with the best automation, sometimes you might want to make minor adjustments to your hearing aids. Two different smartphone apps are available to control your Coselgi Effect. You can also use a button on the hearing aid itself – or a handy DEX accessory, such as a remote control.

MODELS AND COLOURS

The Coselgi Effect family of hearing aids comes in seven behind-the-ear models and three in-the-ear models. Your hearing care professional will recommend which model best meets your needs. When it comes to colour, though, you call the shots!
